## **UNITECR 2023 - Conference Proceedings With all lectures now for non-participants**

*Höhr- Grenzhausen, November 3, 2023*

From Sept. 26 - Sept. 29, 2023, more than 1,100 participants attended the Unified International Technical Conference on Refractories (UNITECR) in Frankfurt, Germany. With the purchase of the ticket, the conference proceedings with 894 pages were also included. All 219 lectures on the main topic “The Carbon Challenge” are presented inside.

All authors, topics, graphics and tables, literature overviews and much more are arranged according to the nine topics of responsibility of the scientific congress:

1. Raw Materials
2. Advances in Monolithic Technology
3. Refractories for Iron- and Steelmaking
4. Refractories for Non-Ferrous Metallurgy
5. Refractories for Non-Metal Industries
6. Modelling and Digitalization
7. Education
8. Testing and Standardization
9. Basic Refractory Science  
and Technology Transfer

[Join the shop to buy the proceedings.](#)

The refractory industry used this conference to hear the current state of technology and discuss it with the speakers and other participants. This exchange of knowledge is valuable so that the industry's upcoming tasks in production and application can be further developed and implemented.

For everyone who was unable to attend the conference, the conference proceedings are now available for a limited period of time at a price of 149 euros (including VAT).

After payment in the Tentary shop system, a link to download the conference proceedings (330 Mb) will be sent.

Members of the German Refractory Association receive a discount of €50.
