

## Press release

### **ECREF Seminar: Pressing technology in manufacturing.**

*Höhr-Grenzhausen, 18. September 2025*

The ECREF seminar „Pressing technology in manufacturing“ discusses the technology of pressing in order to manufacture refractory materials from a practical point of view. This includes the discussion of possible mistakes made during pressing. In addition, the design of moulds will be introduced, as well as the latest news in kiln technology, representing the subsequent step in the manufacturing process of refractories after pressing.

The seminar addresses the people working with and at pressing and presses, i.e. operators, maintenance personnel or technical managers, on a technical level.

**Date: 10 - 11 November 2025**

**Location:** European Centre for Refractories  
Rheinstraße 58 | 56203 Höhr-Grenzhausen | Germany

Participation fee (excl. of VAT):

- Registration until 25 October 2025: 240 €.
- Registration after 25 October 2025: 290 €.

The participation fee covers the seminar, beverages, lunch, and a common dinner. Accommodation is not covered by the participation fee, please book your hotel individually.

The detailed seminar flyer with all further information and contents of the two-day program can be found here: <https://www.ecref.eu/de/all-events/pressing-technology>
